

I2C_BusLock

I2C_BusUnlock

select_mutex

```
graph LR; A[I2C_BusLock] --> C[select_mutex]; B[I2C_BusUnlock] --> C;
```

The diagram illustrates a dependency where two functions, I2C_BusLock and I2C_BusUnlock, both utilize a shared mutex named select_mutex. I2C_BusLock is positioned above I2C_BusUnlock, and both have blue arrows pointing to the select_mutex box on the right.
